

# The Child's Gallery

Each child has a **gallery space** on a wall or door in my kindergarten room for **special pieces to be organized and displayed**. Having this in place on the first day of school, supports the development of classroom ownership. Parents enjoy visiting their child's gallery over and over again!

## **TIPS:**

- ❑ I have the child's picture and art from the home visit mounted prior to the child's entry into kindergarten.
- ❑ Children have freedom to post items of choice through out the year.
- ❑ The child's gallery is in addition to other work displayed on classroom bulletin boards and in various displays throughout the school.
